

CRM INTEGRATIONS

www.televoips.com

The TeleVoIPs platform offers CTI (Computer Telephony Integration) functionality to seamlessly link your VoIP phone system with the CRM solution of your choice. Integrating your business phone data with your customer database means serving your clients more efficiently and improving your team's workflow.

Some systems we integrate include:

Learn how CRM integration can help your team measure and improve ROI and increase sales revenue:

- Instantly create tickets or new contacts
- View history so your client never has to answer the same question twice
- Add notes to existing contacts and companies
