

TELEVOIPS WIRELESS

teleVoIPs®
Business Phone Solutions

www.televoips.com

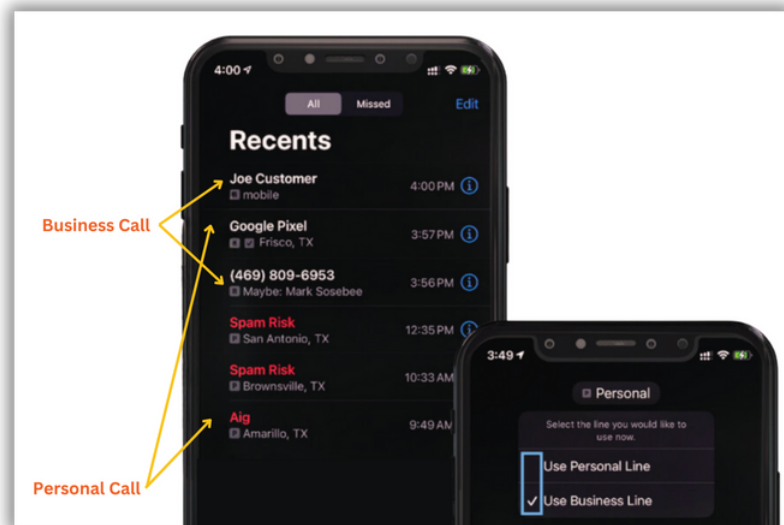

TeleVoIPs Wireless provides mobility solutions for businesses by using SIM or eSIM cards to reflect business identity on personal devices. It offers various data plans and can replace existing wireless providers for integrated services.

TeleVoIPs Wireless integrates communication for office and field staff, providing insights and cost savings by combining call and SMS data into one reporting interface for improved efficiency and success.

Advantages:

- **BYOD Business Readiness:** Embeds a secure business line in personal phones, reducing the need for company-provided mobile phones.
- **Dual Personas:** Separates business from personal communications.
- **No Apps Needed:** Utilizes native phone dialer for the best quality calling experience.
- **Fast, Simple Installation:** This can be done remotely in minutes anywhere using an eSIM.
